DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Salz in view of Reich, II.

Salz discloses the claimed invention except it is uncertain if the main body 120 is made of a mesh material and the outer cover 110 has a smooth surface. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use a mesh material for the Salz main body and a smooth surface material for the Salz outer cover, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Further, Salz discloses the claimed device, as discussed above, except for the main body having a detachable, waterproof inner bag. Reich, II discloses that it is known in the art to provide a detachable, waterproof inner bag 18 within the main body of another flexible bag. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the main body of Salz with the detachable, waterproof inner bag of Reich, II, in order to protect the contents of the main body from water damage.

Response to Arguments

3. Applicant's arguments filed 7/28/03 have been fully considered but they are not persuasive.

As a note, the first sentence of applicant's "Remarks" is incorrect. Only claim 1 is pending. Claim 2 was cancelled in the amendment filed on 1/22/02.

Applicant argues the Examiner's position that making the inner bag 120 of Salz from a mesh material is an obvious design choice by stating, "[T]he Examiner's position is unfounded given the advantages of having the main body being made of mesh material...." Applicant remarks that mesh material gives the bag "an air permeable condition, which allows for items placed in the main bag to be easily checked from outside and wet or damp items to be willingly dried." It is brought to applicant's attention that air and visual permeability of mesh material is notoriously old and well known to a person having ordinary skill in the art. Furthermore, making main bodies made from mesh material is old and well known as evidenced by the prior art of record. Applicant's arguments fail to show that making main body (such as that of Salz) from a mesh material having known characteristics provides "advantages" that would be unexpected by a person having ordinary skill in the art.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does

not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
